## About MillworX

MillworX Precision Machining, Inc., has over 100 years of combined industry experience. We produce precision 3, 4 and 5 axis, close tolerance machined parts. Our process and inspection procedures are certified to ISO 9001:2008/AS9100:2004 Rev. B.

## Our Philosophy

MillworX Precision Machining, Inc. is committed to providing customer satisfaction with the highest standard of quality machined products, on time, and competitively priced.

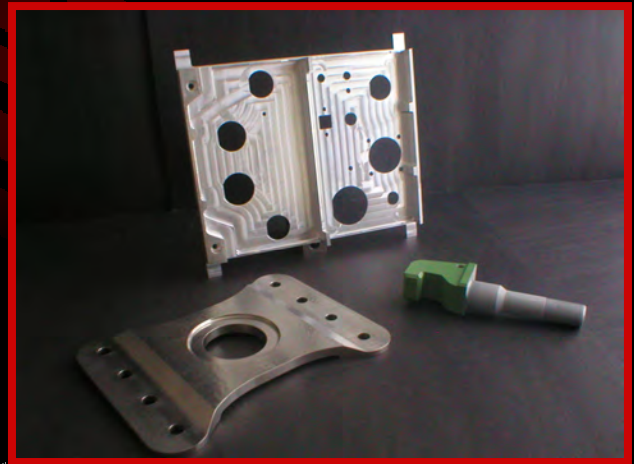

## Quality Policy

MillworX Precision Machining, Inc., strives to provide affordable quality products on time to achieve the highest degree of customer satisfaction. Our efforts are focused on the requirements of the Quality Management System and striving to continually improve all aspects of the business while promoting employee involvement.

*We Manufacture Quality Products On Time*

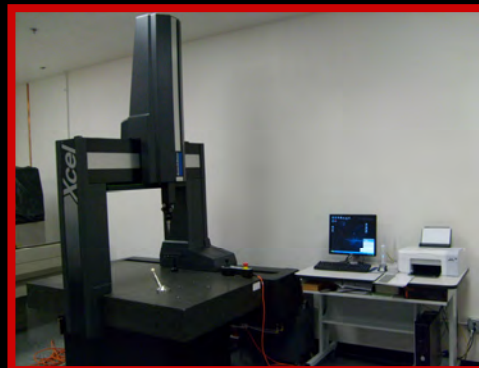

MillworX has the ability to manufacture a vast array of part configurations ranging from simple to complex

**Our state of the art, high speed production equipment allows us to manufacture superior precision parts.**

**Our automated inspection equipment allows us to reduce part verification times, as well as provide accurate, repeatable part measurements.**

**Our 15,000 square foot manufacturing facility provides ample room for future growth to support all of our customers needs and requirements**

**We specialize in machining a wide range of materials from high strength steels, titanium, plastics and aluminum in all forms**

**Our precision parts and assemblies are used in demanding applications ranging from ground and air support to space systems technology**

**MillworX also has an in-house assembly department capable of type 2 assembly**
